1. Scope

These terms apply to definition text, definition codes, and related explanatory material that SKYDB expressly identifies as covered by these terms (the "Licensed Material"). Other website content, database records, photographs, graphics, software, and third-party material are not covered unless they carry their own notice saying so.

2. License

The Licensed Material is available under the [Creative Commons Attribution-NoDerivatives 4.0 International license](#) (CC BY-ND 4.0). The [full legal code](#) governs if this summary differs from the license.

3. Permitted use

You may use, download, copy, and redistribute the Licensed Material, in whole or in part, in any medium and for any purpose, including commercial purposes, without a license fee. You may apply SKYDB Definitions in software, databases, measurements, classifications, research, reports, and other work. Publication and sharing require credit to SKYDB as described in section 5.

Technical changes that are necessary to use the material in another medium or format are permitted as provided by the license.

4. Adapted material

You may not share material in which the Licensed Material has been translated, altered, abridged, rearranged, transformed, or otherwise modified in a way that creates Adapted Material under the license. You may create and use Adapted Material privately, but CC BY-ND 4.0 does not permit you to distribute or otherwise share it.

Contact SKYDB before publishing an independently translated definition, a changed definition, or a technical specification derived from the Licensed Material.

5. Attribution

If you publish, distribute, publicly display, or otherwise share the Licensed Material, in whole or in part, you must credit SKYDB as the source. Place the credit where it can reasonably be found in the relevant publication, website, app, report, presentation, or other medium, and retain the copyright, license, and disclaimer notices supplied with the material.

A suitable credit is: "Source: SKYDB Definitions — SKYDB Corporation. Licensed under CC BY-ND 4.0." Identify the definition or code used, retain its supplied version or date, and include its canonical URL where reasonably practicable. Include the license text or a link to the [CC BY-ND 4.0 license](#). The credit may use a link to a page containing the required details where reasonable for the medium and context.

Your attribution must not suggest that SKYDB sponsors, approves, certifies, or endorses you or your use.

6. Official versions and implementations

You may state that your work uses or implements SKYDB Definitions when that statement is accurate. Your work remains independent from SKYDB. Only an unmodified version published by SKYDB may be described as an official SKYDB Definition or official SKYDB standard.

Applying a definition to your own data does not make that data part of SKYDB and does not give SKYDB ownership of your work.

7. Database rights

CC BY-ND 4.0 also covers applicable sui generis database rights held by SKYDB. The license permits the extraction, reuse, reproduction, and sharing of all or a substantial part of the Licensed Material, provided that you do not share Adapted Material. Including all or a substantial part of the Licensed Material in another protected database may create Adapted Material under the license.

8. Trademarks

The license does not grant trademark rights. The SKYDB name, logos, and other marks may be used only for attribution or a truthful reference to SKYDB unless SKYDB has given separate written permission. They may not be used in a way that suggests sponsorship, certification, or endorsement.

9. Third-party material

A credit or notice identifying another rights holder means that the identified material is not licensed by SKYDB under these terms. You are responsible for obtaining any permission required for that material.

10. No warranty

The Licensed Material is provided as-is and as-available, without warranties. To the extent permitted by law, SKYDB is not liable for losses arising from its use. The warranty disclaimer and limitation of liability in CC BY-ND 4.0 apply.

11. Other permission

For a translation, adaptation, certification arrangement, or another use not permitted by CC BY-ND 4.0, contact SKYDB Corporation at: info@skydb.net
